

Music and the Divine Influence

Sangeet Sharma

Architecture is called frozen music. If buildings are constructed with musicological language in mind, they will give off visually delightful music and musical vibrations.

Architecture, painting, poetry and music are interrelated. Picasso and Le Corbusier are painters (artists) whose paintings have musical instruments. Henry Moore (a sculptor) said musical notes are found in his creations. Musical notes are sounds of particular length and pitch (how high or low a sound is) made by voice or musical instruments.

Music is a mathematical science with scientific laws governing harmony and rhythm. The found a definition of music, "It is art built on principles."

Music involves frequencies of vibration of various numerical figures. It is all about rhythm, beats, scale and language which are applied in mathematics.

Mathematicians and scientists were fond of music. Einstein is an example.

Knowledge of music opens the doors to many other fields of knowledge.

Music and musicians are honored all over the world, for example, Sibelius in Finland and Mozart in Austria.

Auditoriums for musical performances must be designed and constructed with much care about technical details and acoustics. The author has a desire to become a performing musician for which he likes designing auditoriums.

He is a semi professional singer. He received necessary guidance and support from Atul Sharma, a famous music director and lyricist in Punjab.

People are associated with different types of music at different stages of their life. He became familiar with Indian Classical Music when he was in India.

He was also introduced to Welsh Choir when he was in the United Kingdom.

He has a great collection of music of various types. He appreciates voices of various singers. As a part of Rotary Project he sang and collected Hindi songs in new and remixed beat. He produced an album "Melody with Me" in 2007.

Music was a means of his advancement. He learnt that music needs a constant practice to gain perfection and that the mirror and microphone do not lie.
